

Aziz Talbi

Product-Oriented Full Stack Web & Mobile Engineer

📍 Munich, Germany | ✉️ a.talbi890@gmail.com | 📞 +49 176 70747819

🎯 Professional Summary

Product-focused engineer with extensive experience building, scaling, and owning multi-platform health-tech products within nimble, fast-paced startup environments. Proven track record of architecting AI automation pipelines, leading mission-critical customer infrastructure migrations, and shipping high-traffic applications to over 70k monthly active users. Expert at bridging the gap between technical execution and business value.

👛 Professional Experience

Physiofit Digital GmbH | Munich, Germany

Software Engineer (Full Stack / Mobile) | Feb 2024 – Present (Full-Time since Jan 2025)

Core Engineer in a 2-person team (CTO + self). Co-built, scaled, and managed an entire health-tech product ecosystem from 0 to **70k+ MAU (9k+ DAU)** across **600+ practices**.

- 🤖 **AI & Automation Initiatives**
 - AI Front Desk Assistant:** Fully responsible for the end-to-end architecture and launch of a voice-based AI phone agent that autonomously handles and resolves real-time patient inquiries.
 - Media Pipeline:** Devised an automated Python (MoviePy) video-generation pipeline, converting hours of manual editing into a 100% self-service asset creation tool via CSV metadata.
- ⚙️ **Infrastructure & Business Operations**
 - Support Tools Overhaul:** Engineered a complete customer support infrastructure migration, replacing Intercom with an open-source Chatwoot deployment to maximize custom control and reduce platform overhead.
 - Sales Lifecycle Automation:** Architected a complex webhook ecosystem connecting HubSpot, Chatwoot, WhatsApp, and Slack to automate lead confirmations, reminders, team auto-assignments, and real-time status updates.
- 📱 **Core Product & Scale Engineering**
 - Ecosystem Development:** Implemented the full frontend/backend stack for 2 Therapist PWAs, a multi-practice Owner Dashboard, an embeddable Patient Web Check-In widget, and a completely redesigned Patient Mobile App.
 - Performance Optimization:** Designed complex data lazy-loading strategies for high-volume pages, eliminating critical production bottlenecks and significantly dropping load times.
 - Production & Firefighting:** Managed high-pressure hotfixes, native iOS (Swift) / Android (Kotlin) build failures, and cloud architecture scaling under tight deadlines using Sentry and GCP Cloud Functions.

GetFit | Munich, Germany

Software Engineer | Jul 2023 – Feb 2024 (Part-Time / Working Student)

- Contributed to a lean, 6-person startup team developing a core React Native mobile application.
- Collaborated directly with the CTO in rapid, iterative product cycles to ship user-facing features that laid the structural foundation for the subsequent pivot into Physiofit.

NTT DATA (Client: BMW) | Munich, Germany

Software Engineer (Frontend) | Jan 2022 – Jun 2023 (Part-Time / Working Student)

- Developed internal management cockpit tools using Angular within a structured corporate enterprise environment, coordinating across multiple stakeholder groups.
- Contributed to the UI/UX redesign of a critical internal incident-management system using React.

Leadership & Academic Projects

Frontend Team Lead | TUM × Mercedes × Salesforce

Sep 2022 – Dec 2022

- Led a fast-moving team of 5 developers building an immersive car-ordering MVP prototype.
- Owned the frontend architecture, managed agile sprint planning, conducted code reviews, and delivered the final presentation to major corporate stakeholders.

iOS Developer Intern (Swift) | Technical University of Munich (TUM)

Mar 2023 – Jul 2023

- Owned the end-to-end development of a 3D Room Builder module inside an AR-based indoor navigation and localization application.
- Integrated 2D/3D spatial modeling features and successfully delivered an MVP presented to key industry partners.

Education

Technical University of Munich (TUM)

B.Sc. Information Systems (Wirtschaftsinformatik)

- **Bachelor Thesis:** *Automated 3D Animation Generation using Blender & LLMs*
- Designed an automated asset pipeline combining Blender Python scripting and GPT-4 to pioneer AI-assisted creative tooling.

Technical Skills

-  **Languages:** TypeScript, JavaScript, Python, Swift, Java
-  **Frontend & Mobile:** React, React Native, Angular, Vite, Next JS
-  **Backend & Cloud:** Node.js, Firebase, Supabase, Postgresql, GCP Cloud, Cloudflare, TypeSense, BigQuery
-  **State Management:** Redux, Zustand, React Context
-  **Operation Tools:** Chatwoot, Intercom, Hubspot, SuperChat, Slack automations
-  **Observability & Monitoring tools:** Sentry, Posthog, Intercom
-  **Other:** Serverless architectures, native iOS/Android modules, AI-assisted development, Blender automation
